

About us

[Changzhou Chenhong Textile Co., Ltd.](#)

Changzhou Chenhong Textile Co., Ltd. was founded in 1996. It is located in Hutang Town, Changzhou City, the hometown of [Solid Dyed Fabric](#). The transportation is convenient. It takes only half an hour to take the high-speed rail to Nanjing in the

north and Shanghai in the south. The company's main business is high-grade yarn-dyed shirting fabrics, flannel, striped cloth, cotton and linen fabrics, bubble cloth, corduroy, dyed cloth, etc. The products are of high quality and are loved by customers at home and abroad. In terms of [Yarn Dyed Tencel Fabric](#) trade, Guangzhou Zhongda and Shaoxing Keqiao have set up a distribution center to radiate the whole country; in terms of foreign trade, it has established good customer relationships with multinational traders, and its products are exported to Europe, America, Southeast Asia, Japan, South Korea and other countries and regions, with annual sales exceeding 100 million yuan.

Products

Solid Dyed Fabric

Dyeing of blank fabrics (woven and knitted fabrics, etc.) by professional dyeing equipment: boxing. Headstitching. Burning, desizing, oxygen bleaching, mercerizing, shaping. Dyeing. Finishing, pre-shrinkage and other processes to produce the finished cloth is dyed fabric

Dyeing fastness is the most important index of dyed fabric.

Dyeing cloth is directly woven with the original yarn, weaving is white, and then get the finishing factory finishing, then the cloth for dyeing. However, dyed cloth can only be dyed in one color and can only be made in solid color. Dyeing cloth is mass produced with lower cost and shorter production cycle. Dyed cloth is dyed on white embryo cloth in a single color called dyed cloth, and its characteristics: plain and natural.

Corduroy Fabric

Corduroy is generally made of cotton, but it is also blended or interwoven with polyester, acrylic, spandex and other fibers. Corduroy is a fabric with a longitudinal pile on the surface, and is made up of two parts: pile and ground tissue. After processing by cutting and

brushing the pile, the surface of the fabric is shaped like a wick with a distinctly raised pile, hence the name. Corduroy is also called corduroy, striped velvet, and trip velvet.

Corduroy use: Corduroy pile is rounded and plump, and the pile is wearable, thick, soft and warm. It is mainly used as outerwear, shoes and hats fabric in autumn and winter, and also suitable for furniture decoration fabric, curtain, sofa fabric, handicraft, toys, etc.

Printed Fabric

Printed cloth is processed by high-temperature printing and dyeing of blank cloth printing paper, which was prevalent during the Tang and Song dynasties and reached its peak during the Ming and Qing dynasties. It was once loved by people and was used as a necessity for the accompanying bedding and clothes. Printed

fabric is a kind of fabric with patterns, and its patterns are various, and good-looking and fashionable, breaking through the monotony of solid color fabric. It also greatly enriches people's material life enjoyment.

The advantages of printed fabric

1. The pattern of printed fabric is various, and beautiful and generous, which solves the problem of only solid color fabric and no printing before.
2. Greatly enrich people's material life enjoyment, and the use of printed fabric is very wide, not only as clothing to wear, but also can be mass production

3. Good quality and low price, the ordinary people can basically afford and be loved by them

Disadvantages of printed fabrics

1. The pattern of traditional printed fabric is relatively single, and the limitation of color and pattern is relatively large
2. In the cotton fabric can not transfer printing, printed cloth with a long time may also have decolorization and defeat of the phenomenon.
